10. The affidavit or other evidence is entered. An explanation	on of the status of the claims after e	ntry is below or attact	ned.
<ul> <li>REQUEST FOR RECONSIDERATION/OTHER</li> <li>11.          ☐ The request for reconsideration has been considered by See Continuation Sheet.</li> </ul>	ut does NOT place the application i	n condition for allowa	nce because:
12. Note the attached Information Disclosure Statement(s).  13. Other:	(PTO/SB/08) Paper No(s).		

Continuation of 11. does NOT place the application in condition for allowance because:

1. Claims 1, 3-4, 7 and 13-15 stand rejected under 35 U.S.C. 102(b) as being anticipated by WO 02/13763 for the same reasons set forth in the previous Office Action mailed 11/17/06.

Applicant's arguments, filed 3/21/07, have been fully considered, but have not been found convincing.

Applicant argues in conjunction with case law that the WO 02/13763 publication is not enabled.

However, lack of data in the WO '763 publication is not necessary mean lack of enablement. The skilled in the art who is practicing the prior art teachings in necessarily practicing the claimed invention. If the specification is enabling, the prior art is also enabling, and if the prior art is not enabling, neither is the specification.

2. Claims 1, 5-6, 9 and 13-17 stand rejected under 35 U.S.C. 103(a) as being unpatentable over WO 02/13763 in view of US. Pat. No. 6,406,693 for the same reasons set forth in the previous Office Action mailed 11/17/06.

Applicant's arguments, filed 3/21/07, have been fully considered, but have not been found convincing.

Applicant contends that he does not understand the logic of this rejection since neither reference teaches the claimed use of anti-EMMPRIN antibodies in the method of treating an angiogenesis dependent disease such as tumor growth and metastases in the first place.

Contrary to Applicant assertions, the WO '763 publication teaches a method for treating tumor growth or metastasis (angiogenesis-dependent disease) in a patient (human) comprising administering EMMPRIN antagonist such as an anti-EMMPRIN antibody, wherein the antibody is monoclonal antibody, wherein the monoclonal antibody is a Fab and F(ab')2 fragment, wherein the anti-EMMPRIN antibody binds to an epitope that recognized by the UM-8D6 anti-CD147 monoclonal antibody (see published claims 1-6; page 8, lines 1-17; page 21, line 33 to page 34, line 6; page 26, lines 9-15 and page 57, lines 19-29 in particular), wherein the antibody is administered intravenously (see page 36, line 29 in particular).

3. Claims 1, 4-7 and 13-15 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Looksmart publication 2001 (IDS ref) in view of Sameshima et al (IDS ref.) for the same reasons set forth in the previous Office Action mailed 11/17/06.

Applicant's arguments, filed 3/21/07, have been fully considered, but have not been found convincing.

Applicant position is the same as in the previous Office Action, the Examiner's position stands the same.

4. Claim 3 stands rejected under 35 U.S.C. 103(a) as being unpatentable over Looksmart publication 2001 (IDS ref) in view of Sameshima et al as applied to claims 1, 4-7, 13-15 and 18 above, and further in view of Owens et al for the same reasons set forth in the previous Office Action mailed 11/17/06.

Applicant's arguments, filed 3/21/07, have been fully considered, but have not been found convincing.

Applicant submits that Looksmart and Sameshima do not render the claims obvious, the addition of Owens et al does not add anything to the rejection.

However, based on the totality of the record as detailed above, the evidence of obviousness found in the combined reference teachings with Applicant's argument for nonobviousness. The Examiner concludes that the claimed invention encompassed by instant claims would have been obvious as a matter of law under 35 U.S.C 103(a).

5. Claims 9 and 16-17 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Looksmart publication 2001 (IDS ref) in view of Sameshima et al as applied to claims 1, 4-7, 13-15 and 18 above, and further in view of US. Pat. No. 6,406,693 for the same reasons set forth in the previous Office Action mailed 11/17/06.

Applicant's arguments, filed 3/21/07, have been fully considered, but have not been found convincing.

Applicant argues that because the primary references, Looksmart and Sameshima, do not fairly teach or suggest the claimed method, the addition of the '693 patent for other anti-angiogenic agents, does not cure the deficiency in the rejection.

However, based on the totality of the record as detailed above, the evidence of obviousness found in the combined reference teachings with Applicant's argument for nonobviousness. The Examiner concludes that the claimed invention encompassed by instant claims would have been obvious as a matter of law under 35 U.S.C 103(a).
